

Kidney Health Screening Passport for _____

About 33% of adults in the United States are at risk for chronic kidney disease (CKD). That's 1 out of every 3 people! Many people don't have any symptoms until the disease has progressed to an advanced stage. That's why CKD is called a "silent killer."

At the Kidney Health Screening today, you will have the opportunity to identify your risk factors for CKD, record screening results, and review your results with a healthcare professional.

Station	My Results
<input type="checkbox"/> Online Kidney Disease Risk Assessment	
<input type="checkbox"/> Blood Pressure Check	
<input type="checkbox"/> Height/Weight & BMI Calculation	
<input type="checkbox"/> Blood Glucose (if available)	
<input type="checkbox"/> Consultation with Healthcare Professional	
<input type="checkbox"/> Kidney Health Handouts	

Take this Kidney Health Screening Passport to your next doctor's visit.
Talk to your doctor about what you can do to protect your kidney health.
